Lawrence #1 Substation & Distribution Upgrades

November 22, 2024

Upcoming Activities in Lawrence

Dear Neighbor,

As you may be aware, National Grid is working on improvements to strengthen the electric distribution systems in your area to serve our customers more reliably. The upgrades include rebuilding the existing substation on National Grid property off South Canal Street as well as upgrading the network of overhead and underground distribution lines within Lawrence to improve system capacity.

This December, crews will begin working in your area to upgrade the existing electrical infrastructure including the replacement and installation of poles and wires. Upgrades will occur on Andover Street, Winthrop Avenue, South Union Street, South Broadway, and several other adjoining roadways in Lawrence. *See the other side of this page for a map of work locations.* This work is estimated to be completed by February of 2025.

During this work there will be an increase of vehicles and crew members within the area. Our employees, contractors, and consultants are expected to wear their required personal protection equipment (PPE), including hard hats, high visibility vests and photo ID's.

To ensure the safety of crews performing the work, it may be necessary to close the roadway, or portions of the roadway, to traffic. Residential traffic is permitted, and signs will be placed in work areas to alert motorists. Police details will be near the work sites to direct traffic.

Work will occur primarily between the hours of 7:00 A.M. to 5:00 P.M. Monday through Friday. In areas with high traffic, night work may be required by the city for safety. Some work may be approved on the weekends. Truck traffic will use caution while on the streets in your area. **Brief power outages may be required to enable some equipment to be replaced, but our field crews will inform you directly if this is necessary.**

If you have any questions or would like further information on construction activities, please contact the hotline at 781-236-6286.

Sincerely,

Eric Sacchetti, Consultant
