## Upcoming Transmission Line Work

### Upcoming Activities

Dear Neighbor,

Over the next several months, National Grid and its contractors will be working within the right-of-way near your home or business.

Starting soon, crews will conduct field data collections including soil borings, survey work, and vegetation maintenance such as tree clearing. This work is being done to support a future proposed project involving transmission line structure replacements and the relocation of a substation in the area.

In order to obtain the necessary information, personnel will be conducting their work within National Grid's right-of-way that is accessed via the PSNH/Eversource substation off St Johnsburry Rd, Littleton, NH and the National Grid switchyard off Dam Rd, Monroe, NH.

During these activities there will be an increase of vehicles and team members within the area. Our employees and consultants are expected to wear their required personal protection equipment (PPE), including hard hats, high visibility vests and photo ID's.

Work will occur primarily between the hours of 7:00 A.M. to 5:00 P.M. Monday through Friday.

Truck traffic will use caution while on the streets in your area leading to the access points.

If you have any questions or would like further information on construction activities specific to its proximity to your home or business, please contact me at [sfalkengren@watkinsstrategies.com](mailto:sfalkengren@watkinsstrategies.com) or 603- 721-2032.

Sincerely,

**Syrena Falkengren,**

**Stakeholder Specialist**
