Upcoming construction in your neighborhood

Clifton Gate Station - Test Holes

February 2024

Dear Neighbor,

We are writing to inform you of upcoming construction in your neighborhood on Willow Avenue & Bay Street. Next week, National Grid will be excavating several test holes within our National Grid yard and in the roadway/sidewalk area on Willow Avenue in Staten Island, NY (see our project map on the reverse side of this page).

The purpose of these test holes is to locate existing underground infrastructure in preparation for the Clifton Gate Station Upgrade project, scheduled to begin in April of this year. Test hole work is expected to take approximately two weeks. Work hours are Monday through Friday, 7AM to 4PM.*

The Process:

Trained contractors will perform the excavations and mark out underground utilities. Crews locate the utilities and take measurements for our records. After these measurements are recorded, crews will backfill and temporarily restore and disturbed areas to New York City Department of Transportation (DOT) and New York State DOT specifications.

What's Next?

National Grid's project team will review the findings from the test hole survey and prepare for the next phase of the project, scheduled to start construction in late April 2024. Our team will contact you prior to beginning the next phase with updated project information and work hours.

Thank you for your understanding as we get set to begin work in your neighborhood. Please contact our outreach team below with any questions related to the **Clifton Gate Station Upgrade Project**.

Thank you,

Stakeholder Management
