24 hours a day, 7 days a week

Gas Safety Tips:

- Take steps to avoid carbon monoxide poisoning:
 - ▶ Have all heating equipment checked yearly by a professional
 - ▶ Install at least one UL-listed CO detector in your home near bedrooms
 - ▶ Never use a gas range for heating
 - ▶ Never use a generator indoors
 - When renovating or performing fall yard cleanup, always keep your outside gas meter out of harm's way.

Manage monthly gas bills with the Budget Plan

For predictable monthly payments based on your usage, consider the Budget Plan. You pay only for the total amount of energy you use in a year.

Seasonal savings tip

Close air leaks and check for adequate insulation in roofs, exterior walls, and wall cavities.

Inspect natural gas pipes regularly

As a natural gas customer, you're responsible for maintaining all gas lines that begin at the outlet of the gas meter and extend above or below ground on your property. Used for outdoor appliances, generators and more, buried gas lines can corrode or leak if not properly maintained.

- Periodically hire a professional plumbing/heating contractor or leak survey and corrosion expert.
- If unsafe conditions are found, have the pipeline repaired immediately.
