

Take Control of Your Energy Use

Brought to you by National Grid, EnergySmart Grocer delivers proven energy efficiency solutions that help grocery stores lower their operating costs and achieve the highest possible energy savings. The service focuses primarily on refrigeration and lighting upgrades, offering personalized guidance and financial incentives to make these improvements easy and affordable for participating grocers.

Benefits of being EnergySmart

- Lower your operating costs
- Increase profit margins
- Achieve immediate and long-term energy savings

A customized approach

Our skilled Account Managers will work closely with you to develop an energy efficiency roadmap specific to your needs. Think of the Account Manager as your own personal consultant, someone you can always turn to for energy efficiency advice and technical expertise.

What we provide

- No-cost energy assessment
- Customized long-term energy efficiency investment plan
- Expert recommendations for persistent energy savings
- Incentives to offset installation costs
- Review of contractor bids to ensure eligibility of products

Who we work with

- Stores with commercial refrigeration, engaged in retail food sales
- Must have peak demand of 60 kW or above
- Your preferred refrigeration, mechanical or electrical contractors
