7. Eversource update on BGN01 value for responses. Currently sending 06 but that is not in IG.
Eversource East only - sending 06 but IG has 11 which is what NGRID sends and is in IG. Daryush to submit ticket to IT to have corrected and conduct testing
8. NGRID Interval Meter ID. CC needed
G3 no longer indicative of interval account. Call to add new field to flag account as interval. Per Sergio this needs regulatory authority.
9. Eversource CC 030 to correct MEA04 code and decimal (attached)
Kvar printed on bill but Eversource bill says KVA. Issue is inaccurate code for unit of measure for KVA missing decimal. Kim recommends removing K2 altogether. CC as-is is fine unless we agree to remove K2. APPROVED as-is.
