3. Description of Project, including rationale for use of National Grid ROW: _____

4. Use of National Grid ROW, including occupations list (i.e. crossings, temporary delivery crossings, access roads, electrical, any other use or occupation(temporary or permanent)): _____

Warning: Extreme caution is to be used in excavation due to the possibility of the existence of other underground facilities along National Grid's rights of way and/or on its properties. Any damage to these facilities caused by the developer/customer installation will be the sole responsibility of the developer/customer.

Land Use Application Form: Wholesale Generation/Transmission Projects

Please complete the checklist below for confirmation of: (i) completion of all steps, (ii) compliance with requirements, and (iii) provision of all necessary information about the proposed project. Contact the National Grid Account Manager, Project Manager, or Pam Aspinall for support or clarification prior to submission. Applications that are incomplete and/or missing attachments will not be reviewed until the deficiencies are cured.

To be considered, **ALL** of the following items **MUST** be either completed or submitted.

APPLICANT:	
<input type="checkbox"/>	Completed and signed Application Form .
<input type="checkbox"/>	Provided project overall site plan w/ location of each proposed crossing and KML of site. (See Supplemental Information: Attachment 1)
<input type="checkbox"/>	Provided plan and profile for each crossing. Include as much detail as possible (See Supplemental Information: Attachments 2 & 3)
<input type="checkbox"/>	Provided copies of all relevant deed(s), easement(s), or other supporting documents .
<input type="checkbox"/>	Provided equipment list and specification.
<input type="checkbox"/>	Provided CAD files (.DXF or .DGN) (when available).
<input type="checkbox"/>	Included wire heights of existing overhead (OH) lines on drawings. (See Supplemental Information Attachment 4)
<input type="checkbox"/>	Provided all environmental permitting or proof that none is required.
<input type="checkbox"/>	Acknowledges requirements outlined in the Land Use Application: Supplemental Information document.

I/We understand that submission of this Application does not authorize use of the Company's Property and/or Right-of-Way, and that final approval is contingent upon a review of the Application materials, impacts to the Company's granted rights, and the negotiation of a formal agreement. No verbal approvals will be granted. No work on National Grid property may proceed until Applicant is in receipt of a fully executed Occupation Agreement and authorization is obtained from National Grid's contract as specified in the Agreement. To the extent construction is performed prior to the completion of the reviews and execution of applicable agreements, the developer/interconnection customer may be required halt construction and/or remove or modify the facilities constructed.

Applicant hereby agrees, upon approval of the plans by National Grid, to:

1. Execute and appropriate occupational agreement;
2. Pay required occupation fee(s) if on National Grid-owned property;
3. Meet all National Grid Insurance Requirements;
4. Obtain all necessary consents from existing Lessees or other authorized occupants of subject National Grid property, if any.

Signature of Applicant(same as above):

Date: _____

Warning: Extreme caution is to be used in excavation due to the possibility of the existence of other underground facilities along National Grid's rights of way and/or on its properties. Any damage to these facilities caused by the developer/customer installation will be the sole responsibility of the developer/customer.

Land Use Application Form: Wholesale Generation/Transmission Projects

IMPORTANT REMINDERS AND

- For projects on National Grid property where there are overhead wires present, Applicant must provide current Wire Heights. Historic wire heights may not be accurate due to erosion, etc.
 - See Appendix A and B in this packet for a detailed description of how to acquire Wire Heights
- Application review process takes approximately 60 to 85 days from the time the application is deemed complete and will determine whether the request is allowable/permitted. The process may take longer depending on the complexity of the project.
- If the proposal is approved, a written License/Assent Agreement (as applicable) will be prepared for execution by the responsible party and any necessary regulatory approvals will be sought. If any regulatory approvals are necessary, no interim permissions will be issued until such approvals are obtained.
- NATIONAL GRID does not routinely grant any permanent interests on its operating property. A License does not transfer any permanent real property interest or title to National Grid property and therefore should not be relied upon by the requesting party as the sole means of access to the property.
- If survey activities are required on National Grid Property for the development of the design plans, prior to any entry on National Grid property, a Right of Entry Agreement will be required. The agreement will need to be fully executed by the design consultant(s) and returned along with proof of insurance as specified.
- Upon application review, additional information and documentation may be required.
