

How we help

We are with you every step of the way by:

- Sharing monthly progress reports.
- Conducting monthly calls with municipalities to learn best practices.
- Developing and printing customized outreach materials (brochures, signs).
- Sending campaign materials to customers (email, bill inserts).
- Providing support for local events (materials, staffing where available).

In addition to our Community Initiative, National Grid works with municipalities to provide:

- ◆ School fundraisers.
- ◆ Education for the next generation.
- ◆ National Energy Education Development Project teacher training workshops.
- ◆ Dehumidifier recycling events.

If your community has climate action goals, our Community Initiative may help you meet those goals by increasing energy efficiency and reducing carbon emissions.

Customers must meet eligibility requirements to participate in the Home Energy Services Program. Eligibility for rebates/incentives is based on findings from the Home Energy Assessment. Energy efficiency experiences and savings may vary. Offer is subject to change by National Grid without prior notice, including rebate levels. Additional terms and conditions apply. See website for details.

National Grid is a proud sponsor of Mass Save.

Save your MA community energy.

Participate in our Community Initiative.

Community Initiative

Our Community Initiative awards up to \$40,000 in grants to Massachusetts municipalities for implementing energy efficiency outreach in their residential communities.

At the start of the program, we work with communities to set goals for the number of energy assessments and residential energy efficiency measures completed in a calendar year. Grants are awarded based on the goals achieved by the end of the year.

Participating communities will also receive the Shining Community Award in recognition of their efforts.

Energy Efficiency Measures may include:

Insulation and heating systems

Air sealing

Programmable thermostats and more

“National Grid is very supportive and innovative throughout the program. They encourage new methods of outreach and collaboration among the communities. They are an advocate for the communities involved, too.”

Christine Andrews

Environmental Housing Programs Coordinator,
Mayor’s Office of Strategic Planning and
Community Development, City of Somerville

By working hand-in-hand with community leaders and encouraging residents to come together for a common goal, we can make a difference and move toward an energy-efficient future.

Eligibility

Municipalities in National Grid’s service area that use gas, electric, or both, are eligible to apply. Municipal light districts connected to National Grid natural gas are eligible as well.

Applying is Easy

- 1 Send statement of interest
- 2 Submit application
- 3 Participate in phone interview
