We're committed to a clean energy future. We want to ensure that you are aware of options and incentives available to heat and cool your property. Please review the information below. If, after reviewing your options, you choose to connect to natural gas, please sign and return this acknowledgment, and we will proceed with the gas service agreement process.

Mass Save® Rebates and Incentives

National Grid, a Sponsor of Mass Save, offers a variety of incentives, services, and support to help business owners save money and improve their businesses' energy efficiency.

**If you are served by a Municipal Electric Company, please reach out to them directly regarding alternatives and incentives as they may not participate in the Mass Save Program. Mass Save is a collaborative of National Grid, Eversource, Cape Light Compact, Unitil, Liberty Utilities and Berkshire Gas Co.*

Building Energy Assessments

Energy assessments determine if a building uses energy effectively and where improvements could be made. During an assessment, a qualified energy consultant takes a comprehensive look at all building systems and identifies the most applicable energy-saving and electrification opportunities. For more information, visit <https://www.masssave.com/en/business/programs-and-services/building-energy-assessments>

Heat Pumps, Electrification Rebates, and Financing

Heat pumps installed in a properly weatherized business can improve comfort, save energy, and reduce carbon emissions year-around. Rebates and financing are available for eligible electric equipment and replacing oil/propane equipment with high-efficiency electric options that significantly reduce carbon emissions. For example, heat pumps can efficiently heat in the winter and double as a cooling system in the summer, while lowering greenhouse gas emissions. Visit [MassSave.com/heatpump](https://www.masssave.com/heatpump) to learn more about heat pumps. The Mass Save HEAT Loan offers 0% financing opportunities for eligible energy-efficient upgrades. To get help electrifying your business, visit [MassSave.com/about-us/electrification](https://www.masssave.com/about-us/electrification)

Generous incentives are available for:

- Building Insulation and Weatherization
- Heating and Cooling
- Lighting and Controls
- Building and HVAC Controls
- Specialty Equipment
- Water Heating
- Pipe Insulation

To explore all of our available energy saving programs, visit [ngrid.com/save](https://www.ngrid.com/save). Contact your Mass Save Sponsor to schedule a no-cost energy assessment. If you are not sure who your sponsor is or if you are interested in learning more about electrification opportunities, use the "Find Your Mass Save Sponsor" tool at <https://www.masssave.com/en/find-your-sponsor>.

I have read the above information regarding other options available to me and I would like to proceed with installing natural gas service or adding new gas equipment.
